Members Respect

- The proposal is a matter of respecting member's exclusive rights on the allocated/assigned resources
- Other members aren't authorized to use those resources without consent (and policy compliance)

Summary

- The proposal is not a matter of routing!
- AFRINIC is NOT the routing police
- Operational mistakes are excluded
- Only clearly intentional and continued cases are a policy violation
- RPKI & MANRS are good, but not sufficient

Should we self-regulate or
do we prefer
governments/regulators
doing it?
